

### True Romance

Here's a little something for the true romantic. Place an ice bucket and champagne bottle in the center. It's absolutely perfect for a wedding or anniversary celebration!

## the new OASIS® Design Ring is full of possibilities.

You've seen floral foam rings before, but you've never seen anything like the new OASIS® Design Ring. It's the only floral foam ring with a plastic tray center. It's perfect for creating one-of-a-kind designs for holidays, parties, weddings, tributes or special occasions.

### Remembrance Basket

A uniquely loving tribute to a lost loved one. Place a basket of loose rose stems in the center of a rose-filled ring. The roses are given to family members as they leave the visitation service.

One-piece design for easy delivery and a no-fuss setup.

- For use with fresh cut flowers, living plants, or a combination of both.
- Design Ring features premium OASIS® brand floral foam, the foam preferred by more florists than any other brand.
- Ready to use right out of the box. Just soak for two minutes and you're ready to go.
- Extremely versatile. Fill the center with plants, flowers, candles, or any accessory to create a one-of-a-kind design.
- Available in three sizes: 10-1/2", 13", 14-1/2"

The OASIS® Design Ring features a solid plastic tray center for design flexibility and easy delivery. Patent pending.

# truly revolutionary

## living plants can thrive in the OASIS® Design Ring!

Add living plants, such as ivy, tropicals or even bulbs. All can take root and actually live in the foam of the Design Ring. The tray makes watering easy – just pour water in the center and plants will grow and thrive. Over time, your customers can replace the cut flowers with flowers from you or their own garden, extending the life of the arrangement and value of the Design Ring.

**Celebrate Spring**  
Celebrate Spring by incorporating bulb plants into an ivy-filled ring.

### Easily add living plants.

1. Float soak the Design Ring foam side down for about two minutes. Place ivy plugs in the foam by cutting small holes throughout the ring. Use greening pins to secure the ivy trailers to the foam.
2. Bulbs can be placed into holes cut in the foam, and secured with greening pins.
3. Cover sections of the floral foam with moss and secure with greening pins.

### Watering Tips

- A watering gauge is included with every Design Ring.
- Place the watering gauge into the foam after you have completed your design.
- The watering gauge shows your customer exactly how much water to add when rewatering.
- To prevent overflow and spills, water should not exceed water level line.
- The Design Ring should always be displayed flat.

**It's easy to rewater.** Just pour water into the center of the ring. Remember to pour slowly to allow the foam to take up the water and to prevent overflow and spills.

## imaginative arrangements...

clever, beautiful, easy to create.

### Candy Delight

For the ultimate Halloween treat, fill a brandy snifter with candy. No assembly required – just pick it up and go!

### Holiday Glow

An elevated candle placed atop a glass cylinder casts a soft and inviting glow on a beautiful holiday arrangement of roses, pomegranates, and evergreens.
